Project Managers, System Engineers and Communications Technicians

- Market leading mine communication solutions
- System design and implementation success
- USA

Mine Site Technologies' solutions are trusted by the world's largest mining houses and operate in over 400 mines globally. By working closely with these customers over 20 years Mine Site Technologies has been able to develop market leadership through the sale of the broadest suite of solutions.

We are currently looking for Systems Engineers, Communications Technicians and Project Managers, to implement and maintain a number of major communication projects across the USA.

To be considered for any of the roles you will have,

- Appropriate qualifications for the role,
- Experience in successful delivery in your chosen discipline,
- Knowledge of IP networks,
- The ability to build and foster relationships and networks with customers at multiple levels,
- Have strong written and verbal communication,
- The ability to undertake travel throughout the USA on a regular basis.

Knowledge of the mining industry, especially coal mining is highly desirable.

We take great pride in our staff and offer an interesting and rewarding career opportunity within this rapidly developing industry sector. The successful candidate will receive a competitive salary package commensurate with their skills and experience.

If you feel that this job suits your interest please submit your CV to Mike Foletti VP US Operations at m.foletti@minesite.com.au .

More information about Mine Site Technologies can be found at www.minesite.com.au

Note: US citizens or Green Card holders only to apply.
